Hiring Manager

Human Resource Department

Dear Hiring Manager,

After knowing about Grafana's unique objectives, I became so excited and interested more about digging more about the positions that you might have within your organization. Fortunately, I was so excited to get to know that there is suitable playground for me, which is software Development, where I feel comfortable and ready to support you, achieve your goals and change the world together.

Please, after reviewing my resume, you might find that I am looking at my first professional job in my career but let us not worry, because I believe that what I have done and achieved in my learning journey is worth more than some jobs are. I am pretty sure that I really deserve this opportunity of growing higher with you and I am really promising that my qualities well fit with the person you are looking at. I am so committed to providing the finest level of a world class software Engineer service, and really promise to bring new positive attitude at your organization and my workmates and give at my best level.

Based on my professional standards, my personal ethics, my ability to handle new pressured situation, and enthusiasm to be perfect, working with your organization seem to be my comfort life to me. With my ability to seek for clear instructions to accomplish my tasks, I am able to get my work done in the way that my supervisor wishes it to be done. This is one my best qualities. I believe to make my effort felt at any time I am given an opportunity in your organization.

It would be my greatest pleasure to be a part of your team. Please you are most welcome to contact me with any question by phone +250789336678, or by emailing me at nishimirwepaul2015@gmail.com. I am looking forward to discussing about this position and the positive change I can bring in your already beautiful and great team.

Best regards,

Jean Paul
